

EM 5½" FASCIA GUTTER Seamless Gutter Machine

Every gutter company needs an EM 5½" Fascia Gutter Machine for those gutter jobs that do not have fascia installed. Our 5½" fascia gutter machine features unique and fully driven forming stations that are enclosed with a steel cover to protect the operators and keep the roll-former free and clear of debris. All bearings are factory-sealed. Eastside fascia gutter machines are driven by a powerful 1.5HP, 110-volt single phase motor and is constructed of heavy gauge steel. The EM 5½" Fascia Gutter machine is completely enclosed, and has removable side panels for easily serviceability. The machine is powder-coated inside and out with a heavy-duty industrial paint finish for protection and features industrial nitrocarburized (QPQ) steel rollers. Nitrocarburizing rollers allow for improved wear, lubricity, strength and corrosion resistance.
