

WE ARE YOUR **POWDER COATING** EXPERTS

Eastside Machine Company has been a renowned manufacturer of both jobsite and in-plant roll-forming equipment since 1960. We also operate a full-scale machine shop with sawing, milling, lathe, and welding capabilities, and we recently added powder-coating services to our portfolio. Our experienced team has the knowledge and capacity to meet all your powder-coating needs.

► **WASH & PRE-TREATMENT**

Parts are thoroughly washed with an iron phosphate cleaner, rinsed, and then sealed with a BONDERITE® post treatment to increase corrosion resistance.

► **POWDER SELECTION**

Standard colors available.*

*Additional colors available upon request.

► **BATCH PRODUCTION**

Batch production allows us to be efficient and flexible with part sizes, ensuring rapid turnaround times.

► **QUALITY CONTROL**

First Article Inspections are conducted on each new run, along with routine checks of mil thickness, adhesion performance, and cure quality.

► **POWDER APPLICATION**

Our expert powder coaters use a Gema powder system to provide consistent and complete coverage of parts.

► **PACKAGING**

Careful and secure packaging to the convenience of your business.
