EM 10 SNAP LOCK Roofing Machine

Eastside's portable EM 10 Snap Lock Roofing Machine is designed specifically for residential and light commercial applications. Its 9 3/4-inch rib-to-rib panel width gives it a look that belongs on homes, while other commercial roofing machines create panels that are not quite aesthetically correct.

This snap lock roofing machine runs 26–29 gauge steel coil for residential and light commercial applications. The strength of the panel is created in the snap lock design, and the concealed fastener system absorbs imperfections in your roof.

9 3/4-INCH PROFILE *(included with the machine)*
